# Price List (as at June 2010)

*The following information is a guide only.*

*Site-specific quotes can be obtained for any GRS system.*

## Plans and Specifications

Each greywater or wastewater design has at least two documents – installation and specifications, and homeowner’s guide. Some systems have additional drawings and information sheets. If you wish to DIY, you can buy these documents to help you with the Council application. These charges also allow you the right to install one of our systems as DIY.

WaterSave Tank	\$110 (and trenches or dripper)
WaterSave Filter	\$110 (and trenches or dripper)
WaterClear Tank-Dripper	\$110
Standard Greywater	\$110
Standard Wastewater	\$110
SupaFlow	\$110

*Plans for different subsurface trench systems, including conventional beds, are included in the appropriate system above.*

## GRS Filter

\$253 (230 + 23 GST)

Filter is also supplied with two filter bags and wall bracket.

Additional 200-300 µm filter bags = \$25.30 (23 + 2.30 GST)

## Approximate Installation costs

The table below lists approximate costs, as installation and materials costs depend on the sizing of the treatment system, distance greywater has to be pumped or drained, and so on.

Item	Materials only cost (inc GST)	Full installation cost
GRS Filter	\$253	
GRS Filter and trench system	\$1500	\$3000

<b>GRS Filter and drip irrigation</b>	\$1200	\$2500
<b>GRS Filter and pumped dripper irrigation</b>	\$2000 - 2500	\$3500 – 4000
<b>GRS Single tank and piped trench system</b>	\$3000 - 3500	\$4500 – 5000
<b>GRS Watersave - Two tank and pumped dripper irrigation</b>	\$3500 - 5000	\$7500 – 8000
<b>GRS SupaFlow (and 4 br kit)*</b>	\$2500	\$7000 - 7500
<b>GRS SupaFlow Plus – additional electronic controller</b>	Additional \$770	(additional \$500)
<b>GRS WaterClear</b>	\$8000	\$10000 - 12000

**Notes:**

1. Full installation includes all design specifications and Council application, as well as Council fees.
2. \*The SupaFlow 'kit' includes dripline irrigation, header pipe, flush valves, vacuum breaker takeoffs, biomatt filter and spare cartridge, KRain distribution valve, punch tool and other fittings as required.
3. WaterClear systems are usually for combined greywater from several units, houses or cabins. Dripline irrigation to garden beds surrounding buildings.
